Planning and Development
Stormwater Division
958 Milstead Ave.
PO Box 1495
Conyers, GA 30012
(770) 278-7100

**Stormwater
Utility**

Facts and Information

Why Do We Have a Utility?

Rockdale County created the Stormwater Utility in 2005 so the County could comply with requirements the Federal Water Quality Act established.

Why Do We Need a Utility?

The pipes and ditches that carry stormwater are wearing out, therefore they need to be repaired and improved regularly in most areas.

What Are The Fees Used For?

Fees collected are used ONLY for stormwater related projects, which are primarily:

- Repairing stormwater pipes in the road right of way
- Maintaining drainage ditches in the road right of way
- Monitoring and improving stormwater runoff quality
- Public education about stormwater and its impacts on the environment

How Much Do You Pay?

Most home owners pay \$40.68 per year for the stormwater fee to the Utility, businesses pay more and some residents pay less.

For a complete description of the rates, and lots more information about the Utility and its ongoing projects, please visit the website at

www.rockdalecounty.org/stormwater

For questions about the Stormwater Utility or what we do please call us at
